Spiritualism

MODERN SPIRITUALISM are the ployed to designate the belief in and practice of discusses open intercourse with the spiritual world. Its Abroad first remarkable phenomena in this country was developed in the case of Andrew Jackson Davis, who in the year 1846, in an entranced state, profeasing to be in immediate converse with the spiritual world, dictated a series of volumes upon the principles of nature and her divine revel About the same time various societies of Shakers in the State of New York, simost simul ancously became the subjects of strange psycho ogical experiences, during which certain mem bers would loss all personal consciousness, while nences purporting to be the spirits of persons of different nations and who had lived in different ages, took possession of their bodies and spoke through their vocal organs. The burden of their communications was reported as fol-" Treasure these things up in your hearts ; say nothing of them for the present to the world's people, but the time is not far distrut when these same wonders which you now behold shall be witnessed extensively in the world" The spirit rapping pho-nomena soon followed, with the advent of the kox sisters, and from that date the mystery began rapidly to propagate itself. The alleged spiritual manifesations became the subject of newspaper ascussions and investigations , medikiplied by hundreds and thousands from among both sexes and all classes There were among took capping mediums and tipping mediums, writing mediums and painting mediums, lifting mediums nd striking mediums, singing mediums, healing mediums and speaking mediums. That great impositions were practiced, spiritualists them selves adout, but the fath soon included among its avowed converts many persons well known in the walks of science, philosophy, literature and statesmanship, and the number of those who have faith in its doctrines is now computed at inlilions In matters of theology there are among them the widest latitude of opinion, each apparently work ing out his own conclusions and being 'a law unto Their pecto heals are now extensively read and airculated, their conventions regularly neld, muniversarius celebi ited, and their advocates

everywhere recognized is the representatives of an established faith Among the representative advocates of the spiritual faith, Mrs. Jonathan Watson may be regarded as of h rown sex chief apostle. She is probably the most widely known, the most in teresting and most effective specker among the so colled trance incdiums and the brief announce ment on Saturday that she would lecture in the Universalist Church lust exeming was sufficient to fill the house. Mrs. Watson is especially a favorite in Titusville, which was the scene of her carliest trials and triumphs, and doubtless there was among some of the audience a certain feeling of admiration for the apraker. springing from a conviction of her perfect sin carily and devotion, more than from sympathy with her philosophy The subject of the dis course, which was prefuend by an eloquent and impressive invocation, was "Hell, Home Heaven," and its leading ldca was that the infini Merty is ever operating to lead man upward that man debuses or exalts himself the his own life makes for himself his own heaven or his own hell neither being a forced condition but existing within and formed upon men and women by themselves

Mrs. Withon is lts conscientions public advocate. She believe these experiences of impressional speaking are authenticated from the spirit world and labore with her pen and voice in high and hopeful ex pectation that "Spiritualism" land as the waters lover the sea
